

**New weight management treatment – Intra-gastric Balloons - at The Wellington**

A non surgical treatment for the seriously over weight has been introduced at The Wellington. This internationally recognised treatment involves a soft silicone balloon being passed through the mouth into the stomach. The balloon is filled with sterile brine solution and remains in the stomach for six months and then it is removed.

For more details on this successful new treatment, please call The Wellington Enquiry Helpline on +44 (0) 20 7483 5148
